Wood pellets

Super

The pellets are manufactured from pure sawdust of broadleaf trees, using unique technology and specialist equipment.

Captain Pellet Super oak pellets are recommended for users who seek high quality broadleaf wood pellets at an attractive price.

Captain Pellet Super oak pellets are manufactured from selected broadleaf tree sawdust with a diameter of 6 mm. The composition of the pellet is 90% oak sawdust and 10% beech or ash wood sawdust. The oak pellets are intended for use in pellet cookers and boilers with an automatic feeder, as well as for specially adapted fireplaces. Only pure sawdust is used, with no bark or other undesirable substances mixed in. Due to the specialist production techniques and state-of-the-art equipment, the sawdust is bonded into pellet granules without any binders. Super oak pellets are designed for heating houses, residential premises and production plants. Their calorific value is not less than 16.7 MJ/kg and the moisture content does not exceed 7.4%, which ensures a highly efficient combustion process with little ash (no more than 1.2%).

Good Pellet Certificate

Wood pellets are classified as a renewable fuel. They are a clean and environmentally friendly fuel used for heating buildings.

We are a member of the GOOD PELLET programme. This is a pellet quality control and supervision system. The purpose of the programme is to systematically, regularly and comprehensively monitor and assess the quality of pellets in the supply chain, from the producer to the end user, by means of the "GOOD PELLET" label. BIOCONTROL Sp. z o.o. is the content supervisor of the programme, whereas the Polish Pellet Council is its expert partner.

The programme is targeted at reliable manufacturers / sellers of pellets who want to provide their customers with the highest quality product from clean sources of raw materials. Pellets are an environmentally friendly, renewable fuel and help improve air quality in our country. The purpose of the GOOD PELLET programme is to ensure availability of highest quality pellets to end users.

When you see the "GOOD PELLET" symbol, you can be sure that the producer, trading company or seller is subject to strict pellet quality control. Pellets marked with the "GOOD PELLET" label are constantly monitored via regular tests performed by a competent and accredited testing laboratory, and the current test reports which confirm the quality of pellets are reliable, verified and available.
